Attachments: 2017-01-11 EPA to OEPA_RIFS workplan comments.pdf; EPA comments on draft RIFS workplan_DRAFT_011017.docx

Hi Maddie,

Please see the attached 2 documents. The pdf is a memo to you outlining EPA's reasons why some of OEPA's comments on the SDDL RI/FS workplan have not been incorporated into EPA's comments on the workplan. The MSWord document contains EPA's draft comments to the PRPs on the workplan, which incorporate many of OEPA's comments. In many cases I reworded them, in some cases combined them with CH2M's or my comment, and in some cases made a slightly different comment to address the same issue that OEPA's comment raised. Please provide correction if you think I've misunderstood something as I reworked them.

Also please note that I am holding off sending the comments to the PRPs until COB Monday January 23 to give you time to let me know if OEPA would like to discuss this further. If you want to set up a call or have some other communications, I will hold off longer, but if I don't hear from you by then, I'm going to finalize EPA's comments to the PRPs and get them out.

Thanks,

Leslie Patterson
